

## Mr. Engineer Follow-Up Study

### Study Details:

1. 548 minute study with 32.09 pause minutes
2. 95% efficiency for total of 1,592 cycles
3. 108% efficiency for 1,433 cycles without problems
4. 98.39 minutes earned downtime
5. 109.07 minutes of problems or 21% of study
6. Change bundle was 53 occurrences taking 44.75 minutes or 9% of study
7. Speed odometer is set to pace time and will blink orange if timer stops

- The red **Horizontal** line represents 14.718 seconds
- The blue vertical line is actual cycle time of the 1,433 GOOD cycles
- Time below the line is greater efficiency
